SYN PRT

CONSTITUTION: condensation product of naphthalen-sulphonic acids

APPEARANCE: brown powder

pH: 4,0-4,8

SOLID CONTENT: 98-99%

CHARACTER: anionic

METHOD OF USE

SYN PRT is a pretanning agent to be applied before the tanning. It accelerates the penetration of the tanning substances especially in the veg tanning. Therefore it can be used also with chrome leather in combination with veg extract to accelerate the penetration.

SYN PRT is very suitable for the pretanning of pickled skins.

The advised quantity is 3-5% for the pretanning.
