

# IDIV

## UR K99

<b>Constitution</b>	polyurethane binder
<b>Appearance</b>	clear liquid slightly opalescent
<b>pH</b>	3-5
<b>Character</b>	cationic
<b>Active substance</b>	20-21%

### Method of use

**UR K99** forms a glossy, transparent, elastic, very soft film that has a good fastness to water and solvent.

**UR K99** has been formulated to be used with casein, like **BIND KT** in the bottom coat to improve the adhesion.

A cationic base coat is particularly suitable everytime it is necessary to equalize the absorptions and to process skin with damaged grain.
